SUMMARY

Full stack developer in Accra with an Electrical and Electronic Engineering background from the University of Mines and Technology (CWA 83). I design, build and ship complete web products: I run a shared Node.js and Express backend that serves seven live applications, build React frontends with careful motion and accessibility, and apply AI in production, including an on-server crop disease model for Ghanaian farmers and a multi-provider AI assistant. My apps run on the web, as installable PWAs, and on Android and Windows.

SKILLS

Languages	JavaScript, TypeScript, Python, SQL, Java, C++
Frontend	React, Next.js, Vite, Tailwind CSS, Chakra UI, GSAP, Framer Motion, accessibility (WCAG)
Backend	Node.js, Express, REST APIs, OAuth (Google), JWT, MongoDB, PostgreSQL, Redis
AI and ML	OpenAI, Claude, Google Gemini, OpenRouter, LangChain, Hugging Face, ONNX Runtime, MobileNetV3
Platforms	Render, Docker, Vercel, PWAs, Android (Trusted Web Activity), Electron (Windows), Git and GitHub

EXPERIENCE

Freelance Full Stack Developer, Self-employed, Accra, Ghana — Current

- Designed and built the company website for BillNova AI Partners Limited, a responsible-AI advisory firm: service pages, a Blender-rendered 3D hero, GSAP motion, privacy and terms pages, and an enquiry form connected to a shared API.
- Built and operate a shared backend (Node.js, Express, MongoDB) that serves seven live products, with authentication, Google sign-in, password reset, transactional email, CORS policy and live API documentation.
- Deployed and maintain all products on Render, including production debugging such as cross-origin cookie rules and cache-safe media delivery.

Industrial Attachment, OpenLabs Ghana, Ghana

SELECTED PROJECTS

- **GhanaCropGuard AI** (ghanacropguard-web.onrender.com): Crop disease and pest detection for Ghanaian farmers. Trained a MobileNetV3 model on 24,881 CCMT field photos (89% test accuracy) and served it with ONNX Runtime inside a Node.js API, with a React web app, an installable PWA and an Android app. Covers 22 conditions across cashew, cassava, maize and tomato.
- **CleanBridge GH** (cleanbridge-gh.onrender.com): Waste collection platform: households book a pickup in a minute, pay with Mobile Money or cash, and track the collector on a live map. Separate collector and operations apps, weekly and monthly plans and push notifications, on web, Android and Windows.
- **GH-GPT** (gh-gpt.onrender.com): AI assistant for writing, coding, images and documents, with saved chats, image generation and Google sign-in. Routes requests across OpenRouter, Google Gemini and OpenAI so it stays available when one provider is down.
- **Nsoro** (nsoro-app.onrender.com): Social app with feeds, posts, profiles, end-to-end encrypted chat and voice and video calls, on web, Android, Windows and TV.

EDUCATION

BSc Electrical and Electronic Engineering
University of Mines and Technology (UMaT), Tarkwa. Cumulative Weighted Average (CWA): 83.

CERTIFICATIONS
